Florida Department of Economic Opportunity
Employment and Unemployment Data Release
October 2020
(Released November 20, 2020)

1. What are the current Florida labor statistics and what changes were there over the month and over the year?

Unemployment Rates

- Florida's seasonally adjusted unemployment rate for October 2020 was 6.5 percent. This represented 659,000 jobless out of a labor force of 10,109,000.
- Florida's unemployment rate was up 3.6 percentage points from the October 2019 rate of 2.9 percent.
- Florida's October 2020 unemployment rate was down 0.7 percentage point from the revised September 2020 rate.
- Note that the number unemployed is not the same as the number of individuals receiving Reemployment Assistance (RA) benefits. The definition of unemployed is those that are without a job, but actively seeking work. A person seeking work is considered unemployed even if they never held a job before. Collecting RA is not a requirement for being counted as unemployed.

Job Counts

- Total nonagricultural employment in Florida was 8,593,200 in October 2020, a loss of 407,600 jobs over the year (-4.5 percent). In October 2020, private-sector employment was 7,505,200, a loss of 368,600 jobs over the year (-4.7 percent).
- For the 7th consecutive month and 8th time since July 2010, Florida experienced a negative over-the-year job growth.
- Total nonagricultural employment increased by 51,600 jobs (+0.6 percent) over the month. Florida's private-sector jobs increased by 61,100 jobs over the month (+0.8 percent).
- Florida lost 1,178,100 jobs from February to April 2020 and has since gained back over half of the jobs lost (+699,700 jobs).

6. What are the categories of unemployed individuals?

“Job losers” are those on layoff or termination seeking work; “job leavers” are those that voluntarily leave a job and then seek work; “re-entrants” are those that left the labor force and have rejoined to seek work; and “new entrants” are those that enter the labor market for the first time seeking work. A decreasing percentage of job losers as compared to the other categories can be interpreted as a sign of an improving economy.
